

El cubo

GABRIEL TEIXIDÓ
2020
Reissue of 1974

Originally designed by Gabriel Teixidó in 1974, El Cubo is a synthesis of its innovative vision and generous approach of improving people's quality of life. The established Spanish designer imagined a lamp that allows the modulation of light intensity. On a slim metal profile, several half-spheres come to life with a simple gesture, for defining a softer atmosphere. Gabriel Teixidó's 2020 new interpretation lends the classic piece a sophisticated silhouette, in line with the essential design language of today.
