

La Table Basse

Designer	Xavier Lust
Year	2002

La Table Basse is a coffee table with a minimalist and modern design, crafted from a single sheet of curved and folded aluminum with a thickness of just 6 millimeters. Available in two finishes, the design of the coffee table and the particular characteristics of the folding of the sheet create structural curvatures of the top both longitudinally and transversally, dictating its personality. La Table Basse combines functionality and aesthetics, perfectly integrating into various indoor, home and contract contexts.

Frame

Curved natural aluminium sheet, 6 mm thick.
