

Metodo

Designer	Leonardo Talarico
Year	2019

Characterised by its sharp, precise lines, the Metodo coffee table was designed for MDF Italia by Leonardo Talarico, talented designer renowned for his strict excess reduction and his search for essentiality in objects and furnishings design. Conceived according to a rigorous stylistic pattern, Metodo develops its shape in the space by means of circles that, placed on different levels, meet to create both the top and the entire structure. The result is a simple yet distinctive product, essential and with a strong personality. Made from matt-painted steel in lead black, shadow grey, or white, Metodo fits seamlessly into various residential settings: from living rooms alongside sofas to the bedroom as an ultra-contemporary bedside table.

Frame
3 mm thick steel, matt powder-coated.

Metodo finishes
