

Random Box & Cabinet

Designer	Neuland Industriedesign
Year	2011

Random Box and Random Cabinet complete the iconic Random collection designed by Neuland Industriedesign for MDF Italia. Versatile and functional, Random Box and Random Cabinet ensure optimal space organization thanks to their storage elements. In the Box version, the doors that close the compartments irregularly alternate with open shelves, combining the elegance of the bookcase with the practicality of a storage unit. The Cabinet option, fully closed, has adjustable internal shelves, adaptable to different needs, maintaining the dynamic design that characterises the collection. Used individually or together with the Random bookcase, Random Box and Random Cabinet enable the creation of compositions of great visual impact and functionality.

Random Box

Bookcase with open compartments and compartments closed by doors, made from medium-density wood fibreboard panels in matt (micro-goffered) lacquer finish; uprights and shelves are 6 mm thick, and doors are 12 mm thick. Back panel in 10 mm thick melamine-coated board.

The fixed shelves are fit into the backs through concealed dovetail slots.

One drawer compartment and open/closed compartments in standard size.

Adjustable feet up to 15 mm.

Note

For safety reasons, the unit must be fixed to the wall. It is instead suggested not to fix flanked units together horizontally.

Random Cabinet

Storage unit made from medium-density wood fibreboard panels in matt (micro-goffered) lacquer finish; thickness 12 mm.

Back panel in 10 mm thick melamine-coated board.

Closed compartments in standard size. Inner adjustable shelvings.

The single unit can always be turned upside down.

Adjustable feet up to 15 mm.
