

# Randomissimo

Designer	Neuland Industriedesign
Year	2015

Randomissimo is the ultimate synthesis of the Random concept, a reduction to the essential which transforms it into a simple graphic line, like an apostrophe on the wall. This piece of furniture for personal objects, contained in the dimensions, mutable, playful and modular, fully reflects the principles of MDF Italia: subtraction, formal and technical simplicity, and a strong emotional imprint. The playful composability and lively colours of Randomissimo allow to create small aggregations or larger compositions, with a dynamic and surreal character.

<b>Frame</b> 2.5 mm steel sheet, matt powder-coated. Wall fixing through built-in brackets with multiple drilling points.	<b>Backrest</b> Backrests included, coated with artificial fibre canvas, complete with magnetic coupling.
