

# Randomito

Designer	Neuland Industriedesign
Year	2011-2025

Randomito is a small hanging bookcase with a strong aesthetic impact, capable of adding dynamism to any space and enriching it like a piece of art. Its single and reversible module can be used individually or combined with others to create customised compositions. Over time, the colour palette has expanded: alongside pure white, English green and burgundy have been introduced — contemporary and refined shades.

Neuland Industriedesign envisioned a bookcase that evokes movement and lightness, with an unmistakable silhouette inspired by the iconic Random. Randomito is ideal not only for residential settings but also for contract spaces, thanks to its versatility and distinctive design.

## Frame

Medium-density fibreboard panels with matt (micro-embossed) lacquer in various colours.  
Uprights and shelves are 6 mm thick; back panel made of melamine-coated board.

## Note

The unit can be turned upside down.

## Randomito finishes

### Frame
