## FINISH:

This bench is made of solid oak (wood) with a light tint of dark oak, and varnished.

## CLEANING AND MAINTENANCE

The furniture should be stored in the most stable conditions in terms of temperature (15-35°) and humidity. Only suitable for indoor use.

It is recommended not to expose the piece directly to air conditioners or hot spots.

Extreme changes in temperature and / or humidity directly influence the material behavior.

Due to its condition of natural (living) element the wood dilates and contracts, (absorbs or releases humidity).

Changes in the parameters already mentioned depend directly on the furniture location in the customer's home.

## PACKAGING:

Each bench is adequately protected with layers of foam wrap and provided in a wooden box.
