

Life System

Year 1975 - 2022
 Designer Roberto Monsani

Monsani's Life system, subtly reportioned and redesigned for versatility, takes on fresh luxury with ribbed glass, diffused LED lights, lightweight glass shelves, and its checkerboard effect in the vibrant vintage car colors of Meda and Lopez Quincoces's vision for Acerbis's fine-finish lacquers.

Its modernized lighting allows the cubes to sit flush against the wall, and in keeping with Acerbis's specialized closures, its hinges have been rendered invisible, underlining the strong lines of its design.

The wall system fulfills a contemporary need in the home with flexibility, visual potency, and Acerbis's exceptional quality and functionality.
