

# MONKEY COAT HANGER

JAIME HAYON  
2021

bd

## COMPONENTS & MATERIALS:

The hanger is made with two pieces; the monkey made of architectural concrete in two finishes: black or grey. And the second element is the bar, made up of a solid ash cylinder with four bananas on the top, also made of solid ash, both wood finishes are open-pore lacquered gray (RAL 7040) or black (RAL 7012).  
Apt only for indoor use.  
Regulatory glides are included.

Composition: the concrete used to make the tables is made up of a mix of natural raw materials and specific additives. The raw materials are taken from sites with calcareous rock deposits (limestone and dolomite) and other metamorphic rocks (granite, basalt and quartzite).

Due to the natural materials used for the monkey we cannot guarantee a totally homogeneous surface or a uniform, even colour.

Only for indoor use in all its finishes.

## DIMENSIONS AND WEIGHTS:

31 x 39x 167h cm - 28 kg  
12,2" x 15,3"x 65,7" h - 61,7 lbs

## PACKAGING:

The product is shipped dissassembled inside a carboard box.

## CLEANING & MAINTENANCE:

The monkey should be cleaned with a damp cloth (an organic flannel is recommended) using only water or a mild soap. Do not use solvents, alcohol or any other products containing these derivatives.  
Wood part should be cleaned with a damp cloth and dried with a cotton cloth.

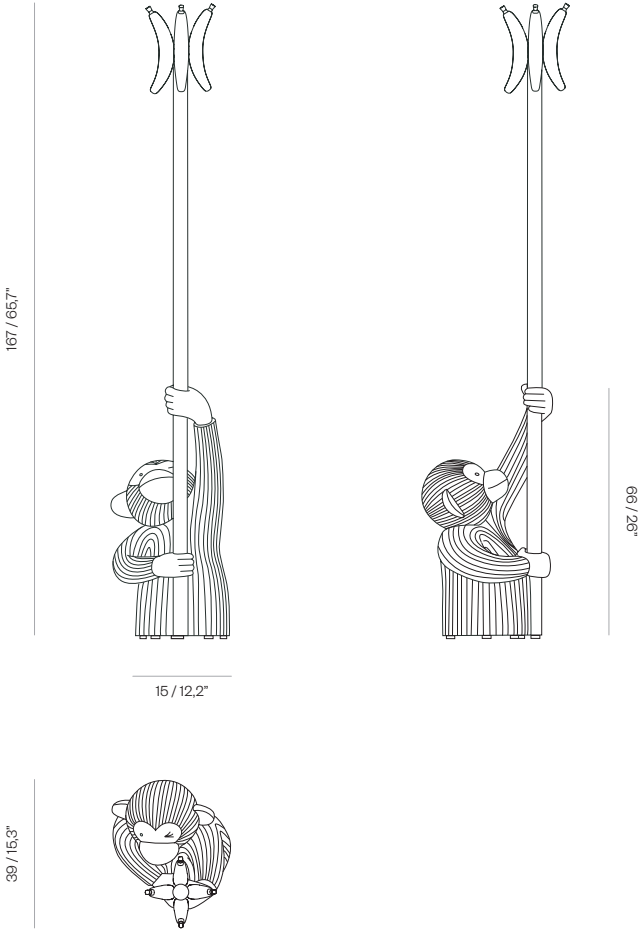

## USAGE INDICATIONS:

The maximum allowed load for each banana is 4 Kg / 8.8 lbs

## TESTS:

Satisfactorily meets the specifications set by the test for a level of L1 (general public use), compliance with the UNE-EN 16121:2014+A1:2017.
