

Cosy Curve

Designer	Francesco Rota
Year	2022-2024

The Cosy Curve collection, designed by Francesco Rota, stands out for its sinuous proportions and the curved lines of its seating, offering a welcoming and convivial feel. With its curved base and backrest, Cosy Curve becomes the natural centre of gravity around which the fluid space of the office and hospitality world rotates.

Perfect for creating fluid and dynamic environments, Cosy Curve is ideal for large common areas, such as receptions and lounge spaces. When combined with elements from Cosy Island, it provides endless possibilities for customisation and bespoke configurations.

The integration of the two versions offers maximum flexibility and adaptability, making them suitable for any context, from spacious reception areas to hospitality environments, including office lobbies and shared spaces.

Frame

Bearing frame made of solid and multilayer wood, base with elastic belts, feet and concealed hook system. Padding in variable-density foam polyurethane padding and polyester wadding cover.

Light armrest

Fully upholstered, removable cover. Consisting of a plywood poplar wood panel, padded with single-density polyurethane foam, covered with polyester wadding. Frame in epoxy powder-coated metal.

Cover

Fabric or leather, removable cover.

Coffee Tables

Top made of 15 mm thick medium-density wood fibreboard. Frame in epoxy powder-coated metal.
