

The new bar stool designed by Gilli Kuchik & Ran Amitai for MDF Italia is a new and elegant addition to the collection. With a friendly and cool design, it is meant to enrich contract spaces, offices, communities, and domestic environments. Twig combines style and functionality, offering sophistication and comfort in every setting, whether it is a dynamic office or a cozy corner at home.

### Structure

The load-bearing structure is made of powder-coated (micro-glossed steel) in the following colours:

- matt painted white X053
- matt painted graphite grey X054.

The footrest is integrated in the structure and is completed with polypropylene strips, always in black.

### Seat

The seat, available in white or black, is moulded in soft integral polyurethane called FreeForm (with a multilayer insert).

FreeForm is a soft and pleasant-to-touch polyurethane with good mechanical resistance.

Only monochromatic combinations available.

Available in two heights: H67 / H78 in the fixed version and H67.8 / H78.8 in the 360° swivel version.

For 360° rotation, it is necessary to purchase the swivel mechanism separately.

This product is suitable for indoor use only.

**For further information about specs, please refer to the technical section at the end of the price list (tables of materials/colours).**
