A perfect synthesis of material and form. Le Cupole table, designed by Francesco Meda and David Lopez Quincoces, is a tribute to geometric purity and sculptural elegance. A piece of strong visual impact, that transforms the power of material into a gesture of absolute balance.

The base, composed of three marble-sculpted domes (cupole in Italian), supports the tabletop with architectural precision, creating a dialogue between stability and visual lightness. The curved surfaces and soft lines of the domes enhance the sense of symmetry and dynamism. The refined details emerge in the rounded forms and in the brass inserts that enrich the composition. The carefully calibrated interplay of proportions accentuates the contrast between the solid presence of stone and the essentiality of the design, elevating the harmony between full and empty, structure and surface.

Le Cupole table is available in Calacatta Oro and Nero Marquinia marble.

Dimensions

Ø 160
B 67.7
H 72.5

Finishes

The table base is composed of three domes made from single blocks of marble with a polished finish, joined together with brass spacers and screws.

The marble top with matt polyester finish is attached to the base with a plate in black or matt white coated steel.

Monomateric table.

– top: matt Calacatta gold marble or matt Marquinia black marble. Thickness 20 mm.

– base: polished Calacatta gold or Marquinia black marble.

– under-top plate: coated in matt black for top in Marquinia black marble and matt white for top in Calacatta gold marble.

Polyester glossy finish not available.
