

Unik-al 594AL

UNIK-AL COLLECTION:
Unik-al 594AL,

Armchair with 4-leg steel frame, polypropylene seat with satin metallic finish.
UNIK-AL – New depths, new perceptions
UNIK-AL is designed to go beyond the simple act of sitting and accompany the time spent in a space. Its wide, enveloping shell welcomes the body naturally, encouraging a more relaxed and informal posture. The three-dimensional texture, which recalls the language of upholstered surfaces, enhances the sense of comfort on both visual and tactile level. The shell is offered with metallic finishes – copper, titanium, gold – achieved through a manual brushing process that gives depth to the surface, enriching it with subtle nuances and helping to define the atmosphere of the space. Conceived for hospitality environments, UNIK-AL invites people to pause and extend the conversation, turning the seat into an active part of the experience.
